

## Chapter one poetry

### **Adding** - Diamante

Adding

plus, combined,

more than, sum ,total

added, all together, - less than, minus,

reduce, lesser, diminish,

take away, decreased by,

subtracting

### **The rule for multiplying** -

When you multiply 2 positive integers your product will always be positive too.

But when you add a negative number, then you will start feeling blue.

### **Subtraction**

In the world of integers minus is a mythical thing. like when you find out about the tooth fairy, there is no such thing.
